

AS FEATURED IN

PRODUCT

QUALITY TO THE CORE

Tell a story with Sternhagen. Fresh on the Australian market, this brand offers world-first product lines such as 3D quartz basins and tiles, 3D ceramic toilets and 3D-style tapware. Pushing boundaries is part of the company's design ethos, and through this pursuit for innovation, Sternhagen has developed Sani-Quartz for basins. This patented material offers built-in, hygienic armour present on the basin's surface through to its core — perfect for easy upkeep and with a silk finish for a designer touch. Resistant to abrasions, scratches, chemicals, stains, heat and naturally antibacterial, this durable material is a representation of the innovation and quality behind each product. Sternhagen's core values can be traced back to

its German origins, and this company has been raising the bar ever since. Receiving accolades such as the Red Dot Award, iF Product Design Award and the Best of KBIS Award, the internationally recognised brand creates only the best. Sternhagen products are a blend of fine art and flawless engineering — a combo that will add extraordinary functionality and aesthetics to your bathroom.
